Chris Nelson

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a strong desire to collaborate with like-minded engineers. I bring a demonstrated history of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs | Remote

June 2022 — Present

- Collaborate with a team of developers to build modern and responsive web applications using best practices
- Build semantically structured full-stack web applications
- Apply agile methodologies like SCRUM for project management

Recent Projects:

Munch Map (Fullstack Web App) – Users can create a meal plan and grocery list to organize their weekly eats. They create meals via an input box and select the desired mealtime (breakfast, lunch, etc). Notes for each meal can also be added and edited. Grocery items are added through an input box under the desired category.

Cocktail Connoisseur (Fullstack Web App) – Users can search for cocktails (both IBA official and niche) and are provided with a straightforward recipe plus a reference picture. It also includes a selection of hand-picked "featured" cocktails if they would like to try something new. Recipes and photos are provided by the TheCocktailDB api.

Other Projects: Rubber + Road Motorsports Photography Portfolio Website, On-demand background color changer for Partnered Twitch streamer, Jupiter Jazz Surf Shop Website
